Abstract Topics

Present at ESPID 2023 across a range of PID abstract topics.

Abstract Topics

- **Antimicrobials**
    - Novel antimicrobial treatments
    - Resistance
    - Pharmacology
    - Antibiotic Stewardship
- **Public health and epidemiology** (only non SARS-CoV2 content)
    - Population studies and surveillance
    - Modelling studies
- **Vaccines** (only non SARS-CoV2 content)
    - Vaccine development (phase 1-2) – viral
    - Vaccine development (phase 1-2) – bacterial and all non-viral
    - Vaccine efficacy (phase 3) and effectiveness – viral
    - Vaccine efficacy (phase 3) and effectiveness – bacterial and all non-viral
    - Vaccine safety (post licensure)
    - Vaccine hesitancy
- **Immunology & compromised host**
    - Host-pathogen interaction
    - Host response diagnostics and imaging
    - Severe/systemic fungal infections
    - Infections in immunocompromised/immunodeficient patients
- **Global health**
    - Zoonosis, vector-borne and emerging infections
    - Tropical/parasite infections & travel medicine
    - Refugees and migrants
- **Infections in early life**

- Congenital and perinatal infections
- Neonatal sepsis
- **Non-respiratory infections**
  - Gastrointestinal infections – Hepatitis
  - Urogenital infections
  - CNS infections
  - Sepsis, systemic and multi-organ infections
  - Skeletal infections
  - Skin Infections
  - STDs
- **Respiratory infections** (only non-SARS-CoV2 content)
  - Viral respiratory infections
  - Bacterial pneumonia
  - ENT infections
- **Mycobacteria and retroviruses**
  - Tuberculosis and other mycobacterial infections
  - HIV/AIDS
- **Digital tools and machine learning**
  - Decision support tools
  - Artificial intelligence in microbiology and radiology
  - Telemedicine
- **Diagnostics and biomarkers**
- **Health associated infections, infection prevention and control**
- **COVID 19 and MIS-C**
- **Microbiome**
- **Prolonged/recurrent fever**
- **Other**
